Trailer Pump Rental

Innovative Concrete Systems, LLC. offers a professional placement of concrete with our Reed B 70 concrete trailer pump. This pump can pump 750' horizontally, 300' vertically and a maximum output of 70 yards/hr with a maximum aggregate size of 1 ½" and is available on a first come, first serve basis.

Advantages of Pumping concrete:

- Can reduce man hours needed for placement of footer, flatwork jobs.
- Can place concrete where there is no access.
- There is no height restriction compared to boom pumps.
- Pumping concrete also helps to reduce the amount of site traffic which can help reduce the amount of mud and debris tracked onto the road.
- Because of potential speed of placement, you can reduce or avoid pour lines and cold joints.

Daily Rental Rates:

- All pours are subject to a minimum of \$200.00 plus concrete usage at the \$2.00/yd over 10 yards.
- Hourly pump rental is \$50/hr port to port.
- Late cancellation (after pump has left the yard) will be subject to a \$100.00 cancellation charge.
- Confirmation of pump placement is required by 1:00 PM the day prior to your scheduled pour.
- Clean-out – If site is not provided for clean-out, and it takes place offsite, it will be at the discretion of the driver to pre-determine the time involved and charge accordingly.
